

Submission Requirements (PDF)

1. GitHub Link

Same repository: IT342-Lastname-AppName

<https://github.com/Andre-12-maker/IT342-Policios-CampusBites.git>

2. Final Commit

Message:

IT342 Phase 3 – Web Main Feature Completed

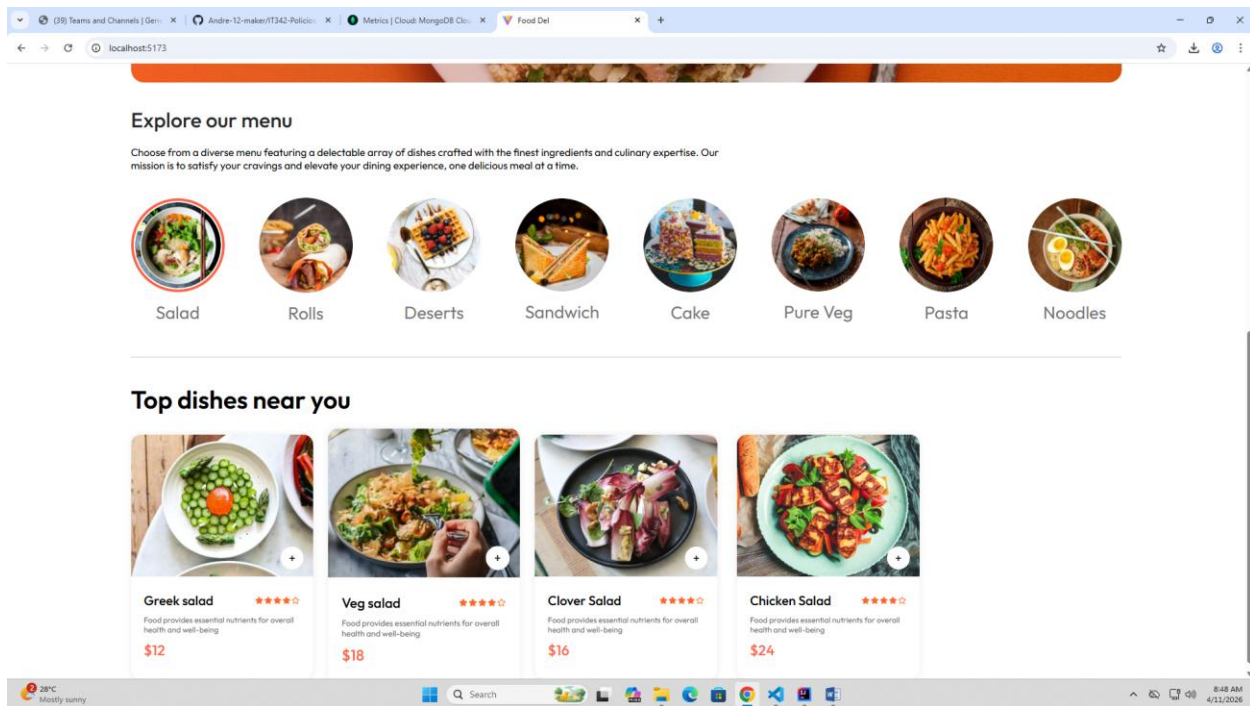

Include commit link or commit hash

e364087

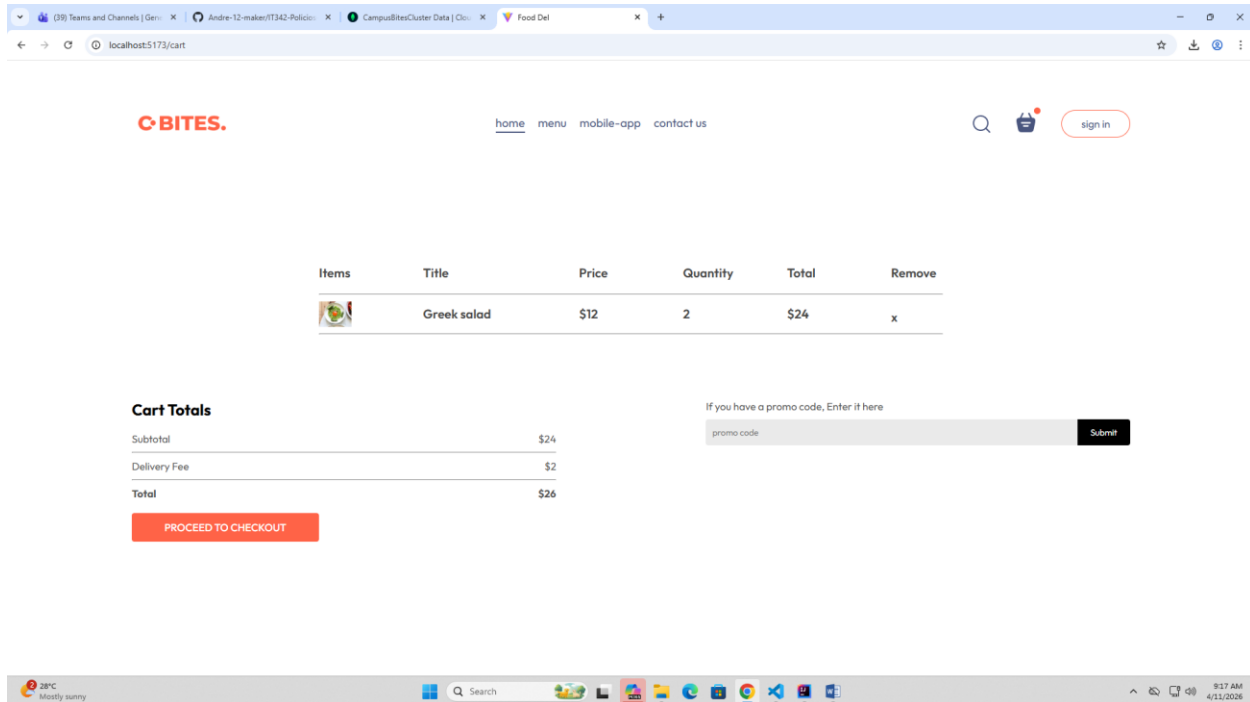

3. Screenshots

Include screenshots of:

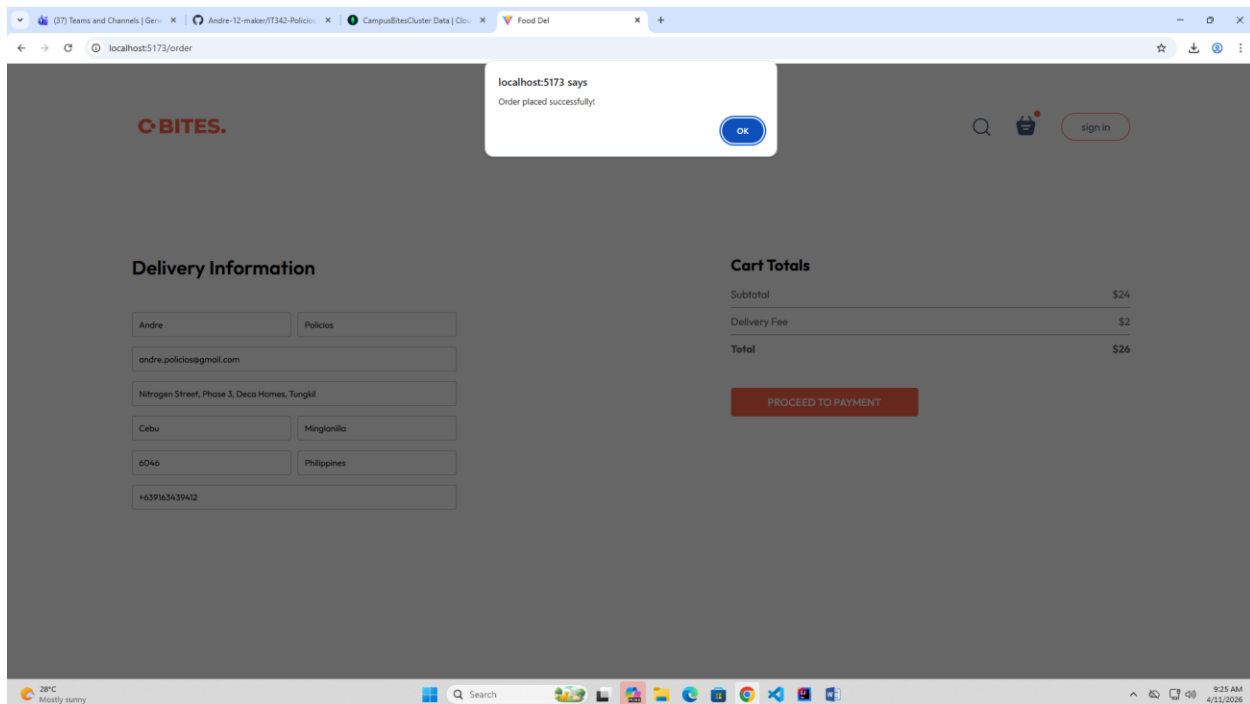

- Main feature page/screen

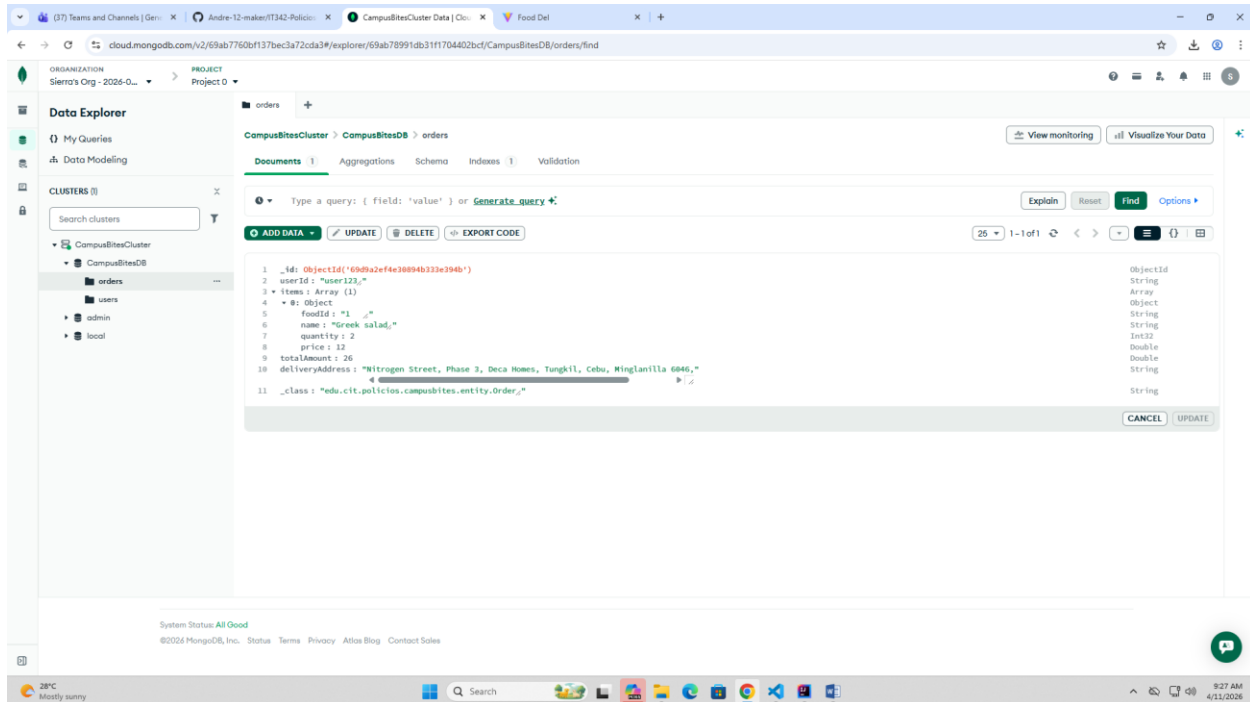

- Adding or using the main feature

- Successful output/result

- Database record related to the feature

Note: Please label it properly.

4. Short Summary

Include:

- Description of the main feature
- Inputs and validations used
- How the feature works
- API endpoints used
- Database table/s involved

Main feature

- A simple food ordering page where users can browse menu items, add them to a cart, and place an order.

Inputs and validations

- Add items with the + button.
- Checkout form requires:
 1. first name
 2. last name
 3. email
 4. street
 5. city
 6. state
 7. zip code
 8. country
 9. phone
- The form won't submit if any field is empty.

How the feature works

- User picks food items and adds them to cart.
- The cart shows quantities, subtotal, delivery fee, and total.
- User fills delivery details and clicks submit.
- The app sends the order to the backend and saves it.

API endpoints used

- GET /api/food — get menu items
- POST /api/orders — save the order

Database tables involved

- foods collection
- orders collection
